

Vertical Trek Innovations & American Adventure Park Systems

WE MAKE FUN SAFER!

American Adventure Park Systems is proud to be the North American distributor of the BEST continuous belay system in the world; The Vertical Trek Innovations Quick Trekker Continuous Belay System.

Retrofitting existing courses is quick and easy. We simply come in and upgrade the exiting course; this can even be done during normal operations! There is no course too big or too small! The Quick Trekker belay system will work with any course.

Our continuous belay system is a must if safety is truly your number one priority.

The Quick Trekker is easy to use, cost effective, quick construction, and will give you the peace of mind knowing that your course is safer.

Why Retrofit?

A Safer Participant

A closed continuous belay system means that it is impossible for a participant to become detached from the belay while connected.

Strength

The Vertical Trek Innovations Quick Trekker Continuous Belay System has connectors rated up to 9-tons,

This means for the first time with a continuous belay system you can have your longest zip lines continuously belayed.

Versatility

The Quick Trekker seamlessly transitions from stairs to tower platforms to aerial elements to zip lines, big and small.

This versatility allows continuous belay throughout your entire adventure park.

One simple system for all of your adventures..

Still Not Convinced?

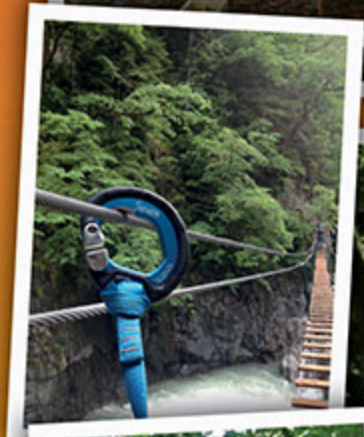

Vertical Trek Innovations has been on the International scene for over a decade. Over 300 adventure parks and zip line canopy tour courses are currently using our patented system.

Aspects such as being: Cost effective, Safer, Simple, and Strong should make this your number one choice to retrofit your current life-line system.

Our system provides you with peace of mind knowing accidental disconnects are IMPOSSIBLE.

"Everyone was awesome and conducted themselves with the utmost professionalism. They are a great bunch of guys. We enjoyed their visit greatly. They were very helpful and patient with all of our questions and concerns. I will highly recommend your company to anyone looking for a belay system or entire course."

Scott Brown, Manager, Crocodile Crossing, St. Augustine, FL
